You are here: MIP API > Commands > 3DM (0x0C) > Device Start Up Settings (0x0C,0x30)

Device Start Up Settings (0x0C,0x30)

Description	**Save, Load, or Reset to Default the values for all device settings.**
Notes	When a save current settings command is issued, a brief data disturbance may occur while all settings are written to non-volatile memory. This command should have a long timeout as it may take up to 1 second to complete.

Parameter Name	Data Type	Description
